

The stadium has 3 categories of seating, section A, B and C

Section	Number of seats	cost
A	300	\$15
B	500	\$12
C	200	\$9

Input: number of seats sold in each section.

Validation Rules:

- Number of seats sold cannot exceed the number of seats in each section.
- Seats sold cannot be zero or negative
- Number of seats sold should be a numeric
- For seats make sure something is entered (cannot be blank)

sales = seats sold times dollar for that section

Output: dollar sales for each section

Total dollar sales
