

On the treadmill, you can burn 3.9 calories per minute.

Create a program that will show the number of calories burned after 10, 15, 20, 25 and 30 minutes.

Create a loop to run the program more than once,
And using different number of minutes

Input: number of minutes (30 minutes first time)

Validation: minutes must be an integer

Minutes must be greater than 10

(this implies minutes cannot be negative or zero)

Minutes must be a multiple of 5 (divisible by 5)

Output:

Minutes	calories
-----	-----
10	39
...	...
30	117
-----	-----
Calories Burned:	117
