

The stadium has 3 categories of seating, section A, B and C

Section	Number of seats	cost
A	300	\$15
B	500	\$12
C	200	\$9

Input: Day of the week and
number of seats sold in each section.

Validation Rules:

- Number of seats sold cannot exceed the number of seats in each section.
- Seats sold cannot be zero or negative
- Number of seats sold should be a numeric
- For seats make sure something is entered (cannot be blank)
- Make sure something is entered for day of week.

sales = seats sold times dollar for that section

Output: Day of the week
dollar sales for each section
Total dollar sales
