Using lists, create a flowchart to collect 12 months of rainfall data.

After the rainfall data is entered, you are to determine:

 the highest, lowest, total and average rainfall.

Sample (example) Output:

Data list: (use simple print)

Highest: 10.6
Lowest: 1.02
Total: 204.9
Average: 22.5

Data for the program:

Data for Chicago (2017):

Jan: 2.87
Feb: 1.52
Mar: 4.01
Apr: 6.43
May: 3.28
Jun: 3.44
Jul: 7.68
Aug: 2.51
Sep: 0.32
Oct: 8.70
Nov: 1.75
Dec: 0.59

Note: data from National Climatic Data Center
